Ceramics Vocab Quiz #4**Matching -Ceramics Vocabulary**

- | | | |
|----------|--|------------------|
| 1) _____ | When fired glaze has bubbles which can break, leaving sharp edged craters in the surface (sometimes caused by firing or cooling too fast) | a) Cone |
| 2) _____ | A shiny reflective glaze. | b) Blistering |
| 3) _____ | A dull glaze surface, not very reflective when fired. It needs a slow cooling period or it may turn shiny. | c) Crazeing |
| 4) _____ | A pyrometric pyramid composed of clay and glaze, made to melt and bend at specific temperatures. It is used in a kiln to determine the end of a firing or in some electric kilns it shuts off a kiln setter. | d) Matte |
| 5) _____ | A revolving wheelhead which sits on a pedestal base. It is turned by hand and used for finishing or decorating pottery. | e) Banding Wheel |
| 6) _____ | The cracking of a glaze on a fired pot. It is the result of the glaze shrinking more than the clay body in cooling process. | f) Gloss glaze |

Multiple Choice- Ceramics Vocabulary

- 7) _____ A revolving wheelhead which sits on a pedestal base. It is turned by hand and used for finishing or decorating pottery.
- | | |
|------------------|------------|
| a) Bat | b) Kiln |
| c) Banding Wheel | d) Wedging |
- 8) _____ A bare spot (from the shrinking of a glaze) on a finished piece where oil or grease prevents the glaze from adhering to pottery.
- | | |
|---------------|--------------|
| a) Absorption | b) Crawling |
| c) Crazeing | d) Annealing |
- 9) _____ Non-transparent glaze, it covers the clay or glaze below it.
- | | |
|-----------------|----------------|
| a) Opaque Glaze | b) Gloss Glaze |
| c) Matte Glaze | d) Matt Damon |
- 10) _____ To load a kiln to hold the maximum number of pieces.
- | | |
|---------------|---------------|
| a) Bloating | b) Blistering |
| c) Burnishing | d) Stacking |
- 11) _____ Material, such as fireclay or alumina, that is able to withstand high temperatures: used to line furnaces, kilns, etc. Material that is heat resistant or has a high melting point.
- | | |
|---------------|-----------------|
| a) Opaque | b) Recalcitrant |
| c) Refractory | d) Blistering |

- 12) _____ Refers to the filling of a mould, a negative of the desired shape, with a slip or slurry
- a) Annealing
 - b) Casting
 - c) Absorption
 - d) Banding
- 13) _____ Decorative technique that involves the addition of molded clay to vessel surface.
- a) Adsorption
 - b) **Appliqué**
 - c) Annealing
 - d) Burnish
